

COSMETIC COCKTAILS  
**MESORGА**

## Extra Antioxidant and Hydrating Treatment

FACE

**It contains:**  
5 vials of 5 ml

## COMPOSITION

**3 different strength levels  
molecular (low, medium and high)  
Hyaluronic Acid**

**Hyaluronic Acid [100 mg/5 ml]**

**Ubichinone (Coenzyme Q10)**

**Glutathione (GSH)**

**Resveratrol**

**Vitamin C**

**Acetyl Hexapeptide-8**

**Succinic acid**

*Professional cosmetic product for topical use only*

Oxidation Fighting & Refreshing Treatment

**ORGANTIOX** is a powerful antioxidant with an absolutely innovative and unique composition: the main innovation is the **triple molecular weight of Hyaluronic Acid**, consisting of three different types of hyaluronic acid chains, with low, medium and high molecular weight, for a moisturizing and revitalizing action.

**Ubiquinone**, also called **Coenzyme Q10**, together with **Glutathione (GSH)**, **Resveratrol** and **Vitamin C**, synergistically perform a powerful antioxidant and anti-aging action, thus contrasting the oxidative stress of free radicals as well as fighting the loss of collagen and elastin, reducing the signs of aging.

#### NEW FORMULA WITH ACETYL HEXAPEPTIDE-8 AND SUCCINIC ACID:

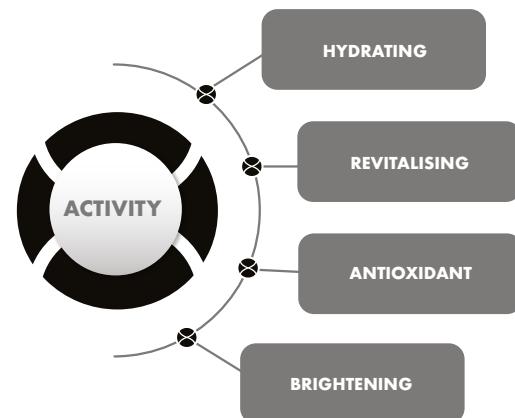

**Acetyl-Hexapeptide-8** is a peptide with 'botox-like' action with lifting, anti-wrinkle and smoothing properties. **Succinic acid** helps treat imperfections wand, with its exfoliating, brightening and smoothing activity, counteracts free radicals by performing an anti-oxidant and anti-ageing action.

**Indications:** suitable for all skin types due to its moisturising and antioxidant action. Reduces superficial/medium/deep wrinkles and dyschromia.

#### Integrated Application Scheme

##### TREATMENT OF SUPERFICIAL - MEDIUM - DEPTH WRINKLES

*Antioxidant / Revitalising / Brightening / Toning*

Technologies or tools that promote the gradual release of active ingredients should be used for product absorption

MESORGÀ

## Supreme Antiaging Treatment

FACE

It contains:  
5 vials of 5 ml

## COMPOSITION

### Hydrolysed Collagen

Acetyl Tetrapeptide-2 composed of 4 peptides resulting in biosynthesized Collagen and Elastin molecules

### Pseudoalteromonas Ferment Extract

High molecular weight Hyaluronic Acid [75mg/ml]

High Hyaluronic Acid [75mg/5ml]

Acetyl Tripeptide-30 Citrulline

Pentapeptide-18

Acetyl Hexapeptide-8

Succinic Acid

Professional cosmetic product for topical use only

# ORGANTage

Supreme Rejuvenating Treatment

This modern anti-ageing complex is essentially aimed at restoring the balance of collagen, elastin and hyaluronic acid lost during skin ageing, which leads to skin with wrinkles and loss of elasticity. The function of **hydrolyzed collagen** is very important: in fact, with advancing age, the contribution of collagen in the dermis decreases by about 1 % per year (er unit of the skin surface). The presence of **Pseudoalteromonas Ferment Extract** promotes recovery of the skin barrier and reduces the appearance of signs of ageing. **Hyaluronic Acid (15 mg/ml)** with a **high molecular weight** acts on the surface, moisturising.

**NEW FORMULA WITH PEPTIDES AND SUCCINIC ACID:** Acetyl Tetrapeptide-2 is a compound of four bio-engineered peptides that gives rise to complex biosynthesized Collagen and Elastin molecules. **Acetyl Tripeptide-30 Citrulline** is used in the formulation for its antioxidant, repairing and moisturising activity. **Pentapeptide-18** is a peptide of five amino acids that reduces the depth of wrinkles on the face caused by contraction of the facial expression muscles, particularly in the forehead and around the eyes. Its effect is similar to **Acetyl Hexapeptide-8**: the two work together synergistically and hinder the process of muscle contraction in two different phases, preventing deep lines and expression lines. **Succinic acid** helps skin regeneration, smoothes the complexion, lightens age spots and makes wrinkles less noticeable.

**Indications:** specifically for mature skin and medium to deep wrinkles.

Technologies or tools that promote the gradual release of active ingredients should be used for product absorption

## Integrated Application Scheme

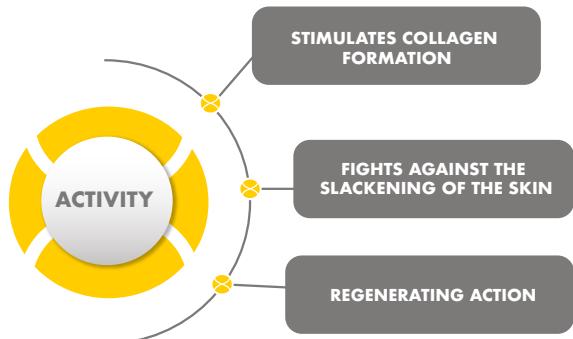

### CARE FOR DEEP WRINKLES ON THE FACE AND AROUND THE EYES

*Regenerating / Lifting / Plumping / Moisturising*

### STRETCH MARK TREATMENT

*Regenerating / Hydrating / Lifting*

MESORGА

## Hi-Tech Lifting Treatment

FACE, BODY, HAIR

**It contains:**  
5 vials of 5 ml

## COMPOSITION

**Combination of five  
bio-fermented growth factors**  
(EGF, IGF-1, acid FGF, alkaline FGF  
and VEGF)

**Amino acids**

**Hyaluronic Acid [150 mg/5 ml]**

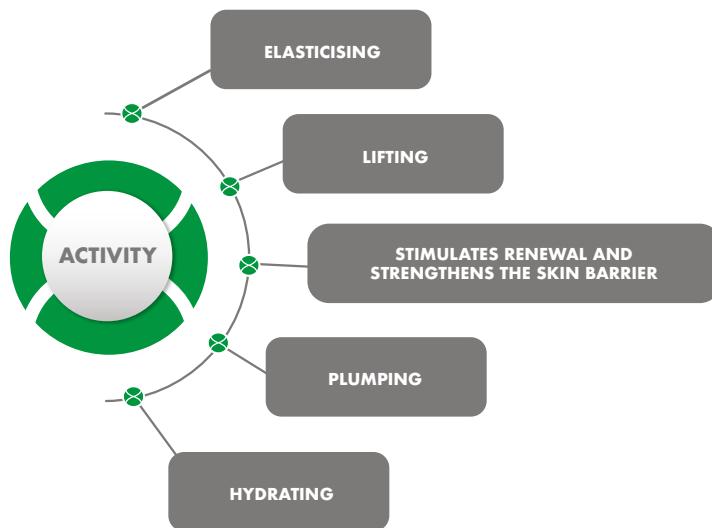

*Professional cosmetic product for topical use only*

# BIOPLACY

HI-TECH Peptides & G F Treatment

**BIOPLACY** is a new treatment with very high bio-technology, consisting of a powerful active ingredient comprising an innovative combination of **5 bio-fermented growth factors** (EGF, IGF-1, acid FGF, alkaline FGF and VEGF), **amino acids** and **Hyaluronic Acid in a very high concentration (150mg/5ml)**, which redraws the contour of the face for an intense anti-ageing action. It is a youth activator capable of reactivating cellular dynamism, reinforcing the skin barrier and acting on visible wrinkles to smooth, plump and moisturise with lasting comfort. Because of its moisturising, plumping, elasticising, lifting properties, Bioplacy is suitable for all skin types and applications.

**Indications:** suitable for the treatment of stretch marks thanks to its elasticising action, for *skin care* with a regenerating and plumping action. Its special and revolutionary formula enables it to be used as a revitalising and strengthening *hair care* treatment.

## Integrated Application Scheme

### HAIR CARE TREATMENT

Revitalising / Strengthening / Moisturising

### CARE FOR DEEP WRINKLES ON THE FACE AND AROUND THE EYES

Regenerating / Lifting / Plumping / Moisturising

### STRETCH MARK TREATMENT

Regenerating / Hydrating / Lifting

### SLIMMING - TONING TREATMENT

Slimming / Draining / Toning / Lifting

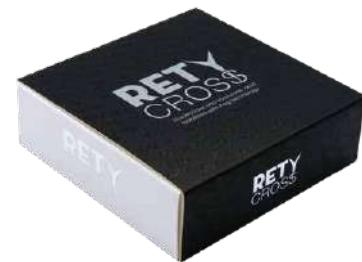

Technologies or tools that promote the gradual release of active ingredients should be used for product absorption

MESORGÀ

## **Nucleotides & Hyaluronic acid stabilized with Peg Technology**

*FACE, LIPS*

**It contains:  
1 vial of 5 ml**

## **COMPOSITION**

**Hyaluronic Acid viscoelastic  
hydrogel [150mg/5ml] stabilised  
with PEG (Polyethylene Glycol)**

**High molecular weight  
fraction (800/4000 kDalton)**

**Low molecular weight  
fraction (400 kDalton)**

*Professional cosmetic product for topical use only*

# RETY CROSS

Nucleotides & Hyaluronic acid stabilized with Peg Technology

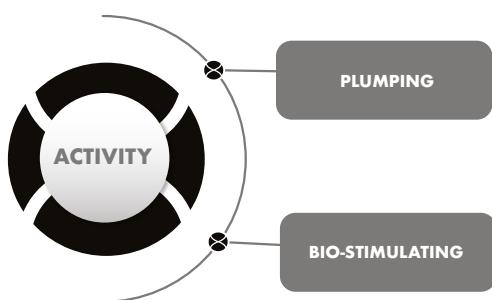

**RETYCROSS** is an innovative sterile cosmetic solution, in the form of a viscoelastic gel based on Hyaluronic Acid stabilized with PEG (Polyethylene Glycol), a new crosslinking agent, crucial in the production process of this particular hydrogel, which allows extreme purity and greater cohesiveness for superior resistance to biodegradation.

In addition, the double molecular weight (medium/low) makes the product favorable to absorption with both suitable technologies and the microneedling technique.

## Integrated Application Scheme

### TNASOLABIAL FOLDS • LIPS • WRINKLE TREATMENT

*Filler effect / Hydration / Deep wrinkles / Plumping*

**Indications:** suitable for all types of wrinkles, and lips for rejuvenation and plumping.

Technologies or tools that promote the gradual release of active ingredients should be used for product absorption

MESORGА

## Hyper Liposculpting Solution

BODY

It contains:  
5 vials of 10 ml

## COMPOSITION

Pentapeptide-25

Tripeptide-3

Carnitine

Caffeine

Sodium Deoxycholate

Professional cosmetic product for topical use only

# MLX1

Hyper Liposculpting Solution

**MLX1** is an innovative Lipolytic cocktail composed by the synergy of various peptides with lipolytic and modeling action.

**Pentapeptide-25** is a biomimetic synthetic peptide suitable for combating cellulite and stretch marks. It has an elasticizing effect and can limit the accumulation of fat in the body, reducing the volume of fat cells.

**Tripeptide-3**, on the other hand, works synergistically by increasing the cellular ATP content (i.e., the available source of the cell) by promoting lipolysis. The very combination of these two peptides ensure us exponential effects of reducing fat masses as well as energizing and energizing the skin and brightening the whole body.

**Caffeine** has a direct lipolytic effect as it is able to reduce lipid accumulation in adipocytes and helps improve skin elasticity.

**Carnitine** promotes increased metabolism of subcutaneous lipid substrates. It has a slimming, firming, stimulating and draining action. It makes the skin more toned, elastic, smooth and firm.

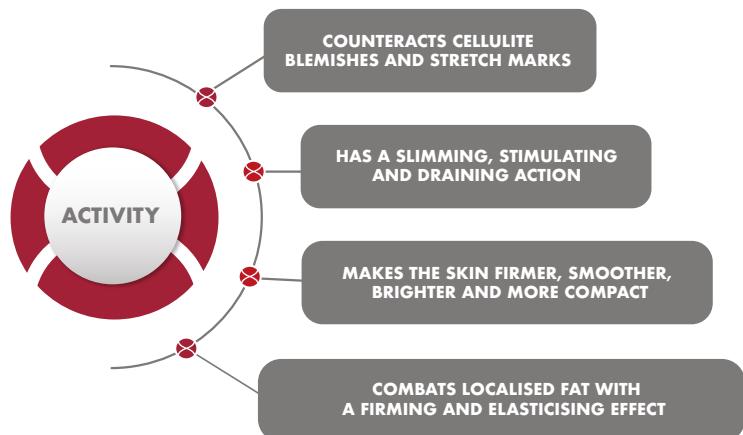

**Sodium Deoxycholate**, on the other hand, has the specific function of emulsifying lipids. It counteracts localized fat with a toning effect.

**Indications:** ideal treatment to counteract localized adiposity, cellulite and orange peel skin imperfections.

## Integrated Application Scheme

### SLIMMING - TONING TREATMENT

*Slimming / Draining / Toning / Lifting*

Technologies or tools that promote the gradual release of active ingredients should be used for product absorption

MESORGÀ

## Face & Body Exosome technology

*Regenerating, Moisturising & Illuminating  
FACE BODY Treatment*

**70  
billion  
of exosomes  
per vial**

Contains:  
5 vials of 5 ml

### COMPOSITION

**Hyaluronic Acid**

**Cyanocobalamin (Vitamin B12)**

**Exosomes from Centella Asiatica and  
Curcuma Longa (total exosomes 70 billion)**

**Bioactive peptides** (Sholigopeptide-2,  
Sh-Polypeptide-1, Sh-Polypeptide-9,  
Sh-Polypeptide-11, Sh-Oligopeptide-1)

**Bio-fermented growth factors**

**Sapphire Powder**

*Professional cosmetic product for topical use only*

# EXOPLACY

Face & Body Exosome technology

**EXOPLACY** is the innovative professional cosmetic that combines the synergy of **hyaluronic acid, synthetic growth factors, peptides** and **plant extracted exosomes**.

Formulated to moisturize, regenerate the skin and counteract skin aging. This cosmetic promotes cell renewal, improving the elasticity of the epidermis, reducing signs of aging and giving a brighter, more even complexion.

**Exosomes from Centella Asiatica and Curcuma Longa** convey active ingredients, enhancing cell communication and stimulating skin repair processes. They have soothing and antioxidant properties.

**Peptide** actives together with **growth factors** promote the production of collagen and elastin, essential for youthful, toned skin.

**Sapphire powder** gives an illuminating and smoothing effect.

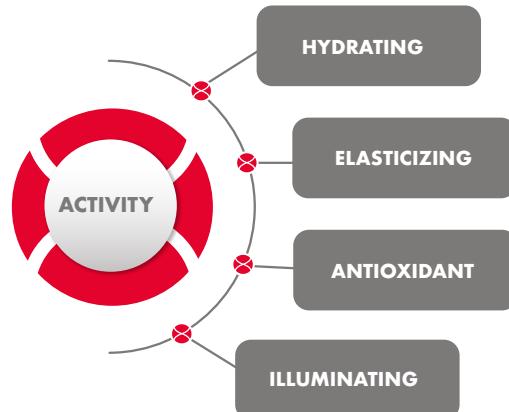

**Indications:** ideal for more hydrated, elastic and compact looking skin; useful for correcting light wrinkles and expression lines.

*Technologies or tools that promote the gradual release of the active ingredients should be used for product absorption*

## Integrated Application Scheme

### TREATMENT OF SUPERFICIAL - MEDIUM - DEEP WRINKLES

*Antioxidant / Revitalizing / Illuminating / Toning*

MESORGÀ

## Hair Exosome technology

*Regenerating HAIR*

70  
billion  
of exosomes  
per vial

Contains:  
5 vials of 5 ml

## COMPOSITION

**Hyaluronic Acid at different weights**

**Panthenol**

**Biotin**

**Arginine**

**Exosomes from Curcuma Longa  
(total exosomes **70 billion**)**

**Bioactive peptides** (Sh-Polypeptides and Oligopeptides)

*Professional cosmetic product for topical use only*

# EXOPLACY hair

Hair Exosome technology

**EXOPLACY HAIR** is a professional product formulated to help repair and stimulate hair growth, hydrating and protecting the scalp, thanks to the synergistic combination of **hyaluronic acid**, **peptides** and plant extracted **exosomes**.

**Different molecular weight Hyaluronic Acid** and **Panthenol** improve hair hydration, volume and elasticity.

**Biotin** strengthens hair and stimulates hair growth through keratin synthesis, while **Arginine** improves blood circulation to the scalp. Together, these substances promote healthy hair and prevent hair loss.

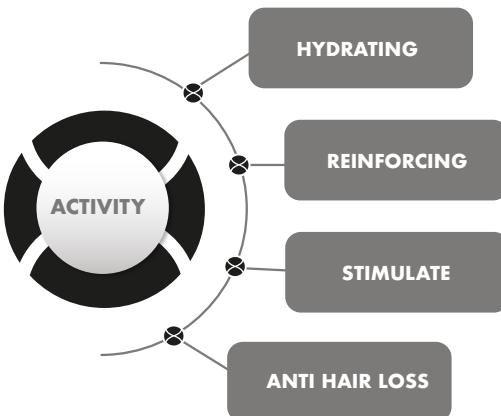

**Exosomes from Curcuma Longa** have antioxidant and soothing action for the scalp.

**Bioactive Peptides (Sh-Polypeptides and Oligopeptides)** stimulate follicles and hair growth.

**Indications:** ideal for those who want stronger, healthier, brighter and fall-resistant hair.

## Integrated Application Scheme

**SCALP REPAIR AND STIMULATION TREATMENT**  
*Moisturizing / Revitalizing / Strengthening / Soothing*

Technologies or tools that promote the gradual release of the active ingredients should be used for product absorption

MESORGÀ

## PDRN Regenerative Booster

*Regenerating and Revitalizing  
FACE Treatment*

### COMPOSITION

**Sodium Hyaluronate**

**Hydrolyzed Hyaluronic Acid**

**PDRN (Sodium DNA) 1%**

**Glutathione**

**Calcium hydroxyapatite 0.01%**

**Contains:  
2 syringes of 2.7 ml each.**

*Professional cosmetic product for topical use only*

# NUCLEORGÀ

PDRN Regenerative Booster

**NUCLEORGÀ** is a product formulated with latest-generation ingredients that promotes skin revitalization and regeneration, based on **Sodium Hyaluronate** and **Hydrolyzed Hyaluronic Acid** with well-known moisturizing properties, **polydeoxyribonucleotide (Sodium DNA)** with lifting properties, useful for correcting light wrinkles induced by chrono/photo aging, and **Calcium Hydroxyapatite (CaHA)**, to improve skin firmness and elasticity.

**Different molecular weight Hyaluronic Acid** provides intense and long-lasting hydration, helping skin appear plumped, more elastic and soft.

**PDRN (Sodium DNA)** helps stimulate cell regeneration, promoting tissue repair and counteracting signs of aging.

**Glutathione** is a powerful antioxidant that helps brighten the complexion and fight oxidative stress and free radical damage.

**Calcium Hydroxyapatite** promotes collagen production, giving firmness and tone.

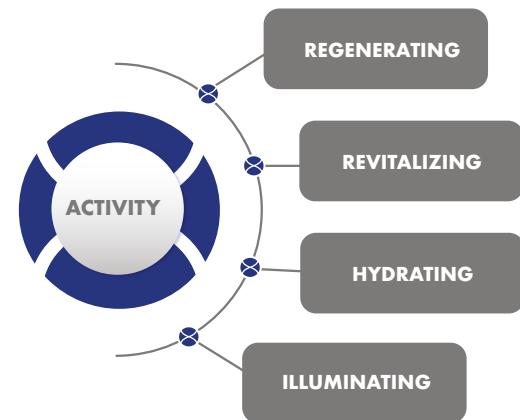

**Indications:** ideal for regenerating, revitalizing, moisturizing and brightening action.

*Technologies or tools that promote the gradual release of the active ingredients should be used for product absorption*

## Integrated Application Scheme

### REVITALIZING AND REGENERATING TREATMENT

*Moisturizing / Revitalizing / Illuminating / Antioxidant*

MESORGÀ

## Stimulate and Regenerative Hybrid Booster

*Stimulating and Regenerating  
FACE Treatment*

### COMPOSITION

**Sodium Hyaluronate at different weights**

**Hydrolyzed Hyaluronic Acid**

**Collagen Type I (Sh-Polypeptide-47)  
and Collagen Type III**

**Amino acids** (Proline, Glycine, Valine, Serine, Arginine, Hydroxyproline)

**Acetyl Hexapeptide-8**

**Trehalose**

**Contains:  
2 syringes of 2.7 ml each.**

*Professional cosmetic product for topical use only*

# SUPER HYBRIDO

Stimulate and Regenerative Hybrid Booster

**SUPER HYBRIDO** is a professional product and with its innovative formula designed to stimulate cell renewal, it improves skin structure and counteracts visible signs of aging. It contains **Sodium Hyaluronate at different molecular weights, Hydrolyzed Hyaluronic Acid, Peptides, Collagen Type I and Type III, and Amino Acids.**

**Hyaluronic Acid at different MW** provides lasting hydration.

**Recombinant Collagen Type I and III** is obtained by synthesis and is similar to skin collagen; it stimulates its production, strengthens the extracellular matrix, and increases skin firmness and elasticity.

**Essential Amino Acids** promote the restoration of the skin barrier, supporting tissue regeneration processes.

**Acetyl Hexapeptide-8** is a biomimetic peptide that acts on muscle contraction by mimicking the mechanism of botulinum toxin, visibly reducing dynamic wrinkles.

**Trehalose** is a **Disaccharide** with high osmotic and antioxidant capacity that protects the skin from oxidative stress and dehydration.

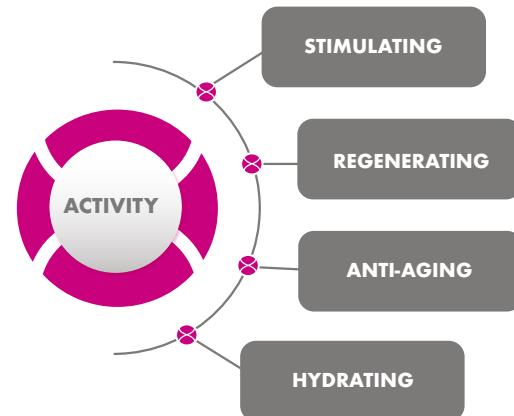

**Indications:** formulated for mature, dull skin or skin marked by expression lines; it is ideal as an intensive anti-aging treatment or as an adjunct in dermo-aesthetic therapies.

Technologies or tools that promote the gradual release of the active ingredients should be used for product absorption

## Integrated Application Scheme

### STIMULATING AND REGENERATING TREATMENT

Moisturizing / Revitalizing / Anti-wrinkle / Antioxidant

MESORGÀ

# MESORGÀ

## AESTHETIC INNOVATION

**Mesorga S.r.l.** is an Italian company specializing in aesthetic medicine and advanced aesthetics, engaged in the production of medical devices and professional cosmetics for the face, body, and hair.

Founded in 2020, Mesorga was born from over twenty years of experience and the merger of the former Makrotech S.r.l., bringing together a multidisciplinary Italian-Swiss team of experts: chemists, biologists, and industry specialists.

These synergies allow us to develop innovative, unique, and effective formulations aimed at achieving superior results through the exclusive use of the purest raw materials, cutting-edge technologies, and compliance with the highest quality standards.

The distinctive "o" in the name Mesorga is not just a graphic element, but represents the harmony between advanced treatments and the organic origin of our products. The "x" shape inscribed in the "o" recalls the molecular structure of hyaluronic acid, highlighting our commitment to the research and development of biocompatible and safe solutions.
