ADVANCED SKIN ANALYSIS  
AND VIRTUAL MESOTHERAPY

NEEDLE-FREE REGENERATIVE AESTHETICS

**SCALP CHECK-UP:** Microscopic examination of the scalp.

**HAIR STRUCTURE:** Morphological and qualitative analysis of the hair shaft.

**TEXTURE:** Skin grain and smoothness.

**AGING & PHOTOAGING:**  
Depth, quantity, and classification of wrinkles.

**REACTIVITY:** Sensitivity level and skin tolerance threshold.

**PIGMENTATION:** Intensity, nature and distribution of spots/discoloration.

**HYDRATION:** Moisture levels within the tissues.

**SMARTYA**  
ADVANCED SKIN ANALYSIS

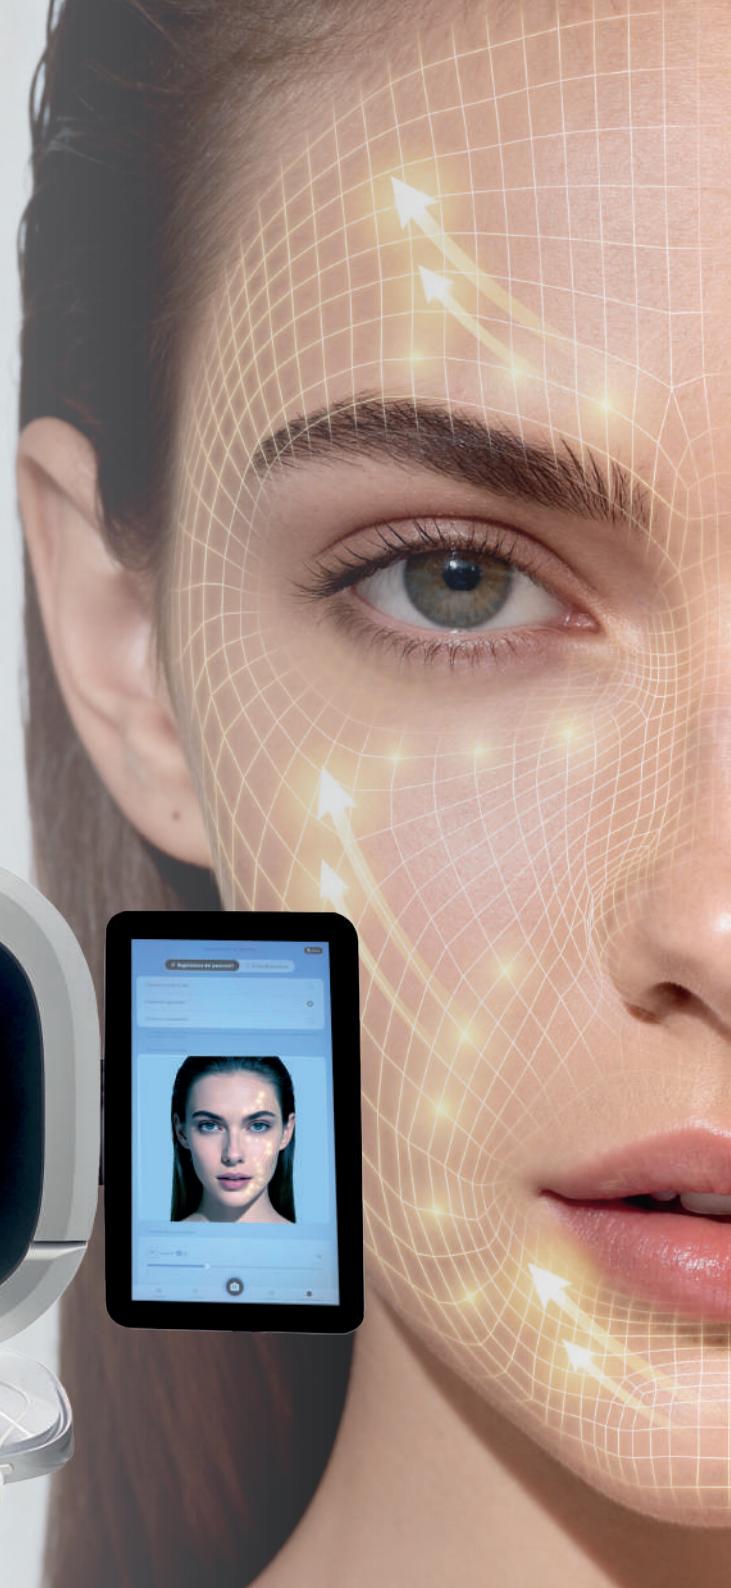

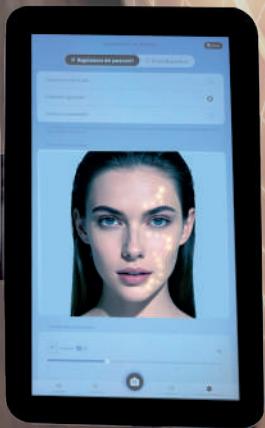

# SMARTYA

## ADVANCED SKIN ANALYSIS

The analysis is based on **advanced imaging technology** that clearly detects both superficial and deeper aspects of the skin such as wrinkles, pores, acne, and the skin barrier offering a comprehensive assessment of the face's condition.

The ability to observe what is not immediately visible allows the professional to understand the real skin conditions and to intervene in a targeted and informed manner. The detection technology also extends to the detailed analysis of the **skin and scalp**, broadening the field of application and strengthening Smartya's role as a global assessment tool. The collected data is processed into clear and structured reports, capable of providing an advanced skin classification and an objective measurement of its condition.

**Three-dimensional facial** images and simulation functions for aging processes and treatment paths contribute to making the experience even more engaging, helping the client visualize potential improvements and make an informed choice toward a more advanced beauty journey.

# RADYANTYA

VIRTUAL MESOTHERAPY

Radyantya® is a technology designed, manufactured, and certified **Made in Italy** 

Every detail is carefully engineered to maximize the effectiveness of Mesorga cosmetic cocktails while respecting the nature of the active ingredients.

**Radyantya®** is a multifunctional platform for professional aesthetics that integrates dermoporation and photobiomodulation technology, combining electrostimulation and electroporation for advanced treatments on the **face, body, and hair.**

The direct delivery of active ingredients deep into the targeted area allows:

- High-concentration localized treatment
- Long-lasting and progressively improving results

Non-invasive  
biorevitalization,  
painless and  
trauma-free, "virtual  
mesotherapy"

Fast and effective results

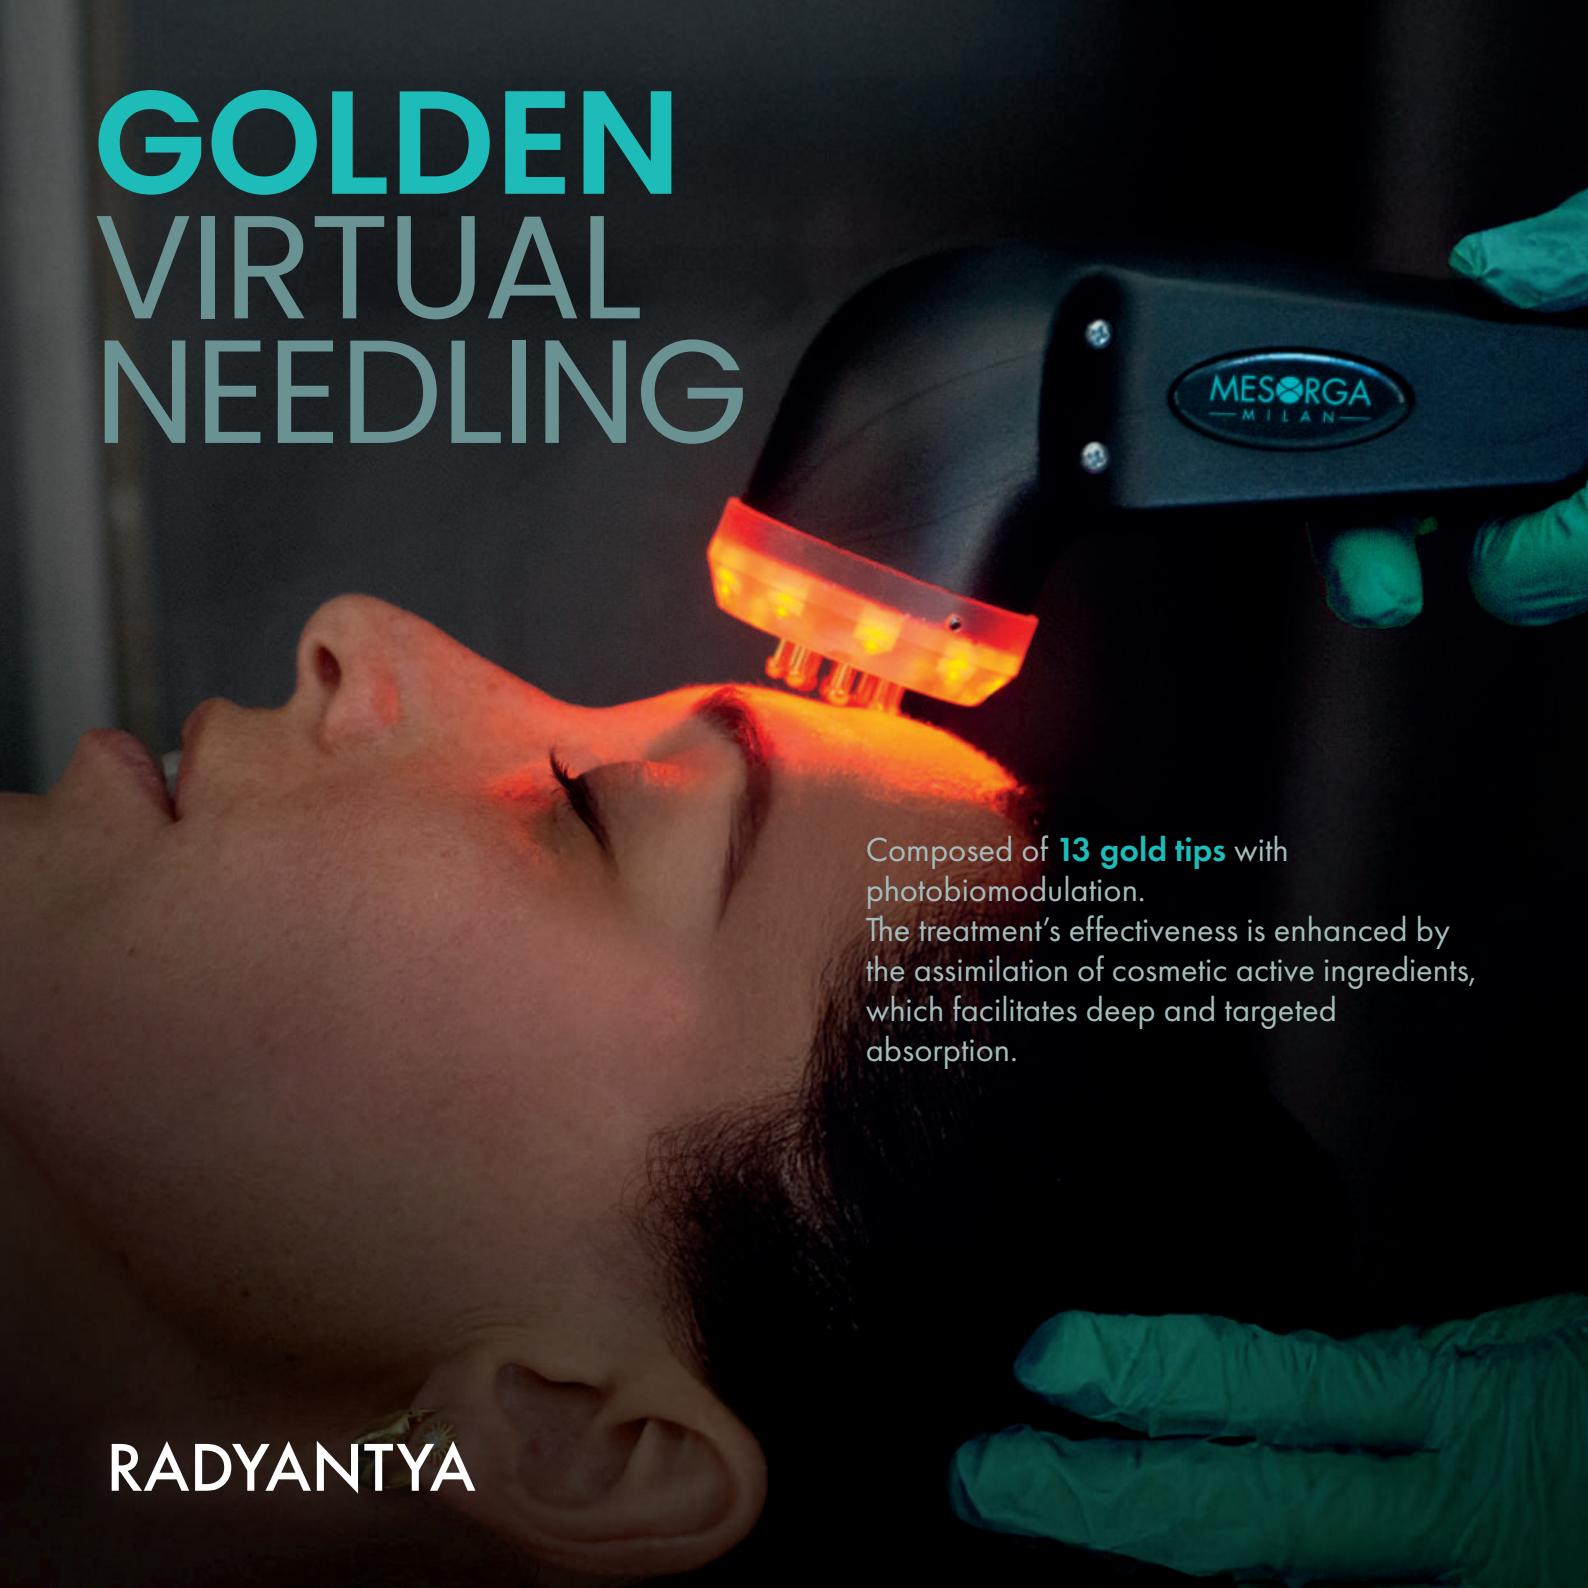

Active ingredients released  
directly at the action sites

Suitable for all skin types,  
imperfections, and seasons

Effective also on the scalp

# GOLDEN VIRTUAL NEEDLING

A woman is lying down, receiving a Golden Virtual Needling treatment on her forehead. The device, which has a black strap with the brand name 'MESORGIA MILAN' on it, is held against her skin. The device has a red LED light strip and 13 gold tips. A gloved hand is visible on the right side of the frame.

Composed of **13 gold tips** with photobiomodulation. The treatment's effectiveness is enhanced by the assimilation of cosmetic active ingredients, which facilitates deep and targeted absorption.

RADYANTYA

# RADYANTYA'S HANDPIECES

The **DermoRevive** and **Golden Virtual Needling** handpieces of **Radyantya®** for face, body, and hair gently stimulate the muscles in specific areas. By using low and medium-frequency microcurrents, they improve skin tone quality and enhance the absorption of active ingredients into the deeper layers of the skin.

FACE

- › **Reduces** wrinkles
- › Stimulates skin **elasticity**
- › **Fights** free radicals

- › **Rivitalizes**
- › **Evens out** skin tone
- › **Effective** on acne scars

BODY

Booster System for body concerns: treatment of cellulite and localized fat imperfections, stretch marks, firming, and toning.

**RADYANTYA**
